PROJECT NAME: “STUDENT WELLBEING”

PROJECT IDEA/FEATURES :

1. Designing a website for the student for their wellbeing.
2. Our website would contain various section regarding hostel complain, mess complains, study material, information regarding clubs and their recent news , recent news of Mnnit and a map.
3. The complain done via our Website are firstly stored in our database and then forwarded to the caretaker office and warden office.
4. As currently if we have any problem in our room then we have to go to the caretaker office and then write our complain with the help of the website our website we can register our complain sitting in our rooms and it also saves paper.
5. It also give a glimpse to the higher officials(chief warden and warden) regarding the problems of the students and their status whether they are solved or not.

TECH STACKS USED

- FRONTEND- HTML & CSS
- BACKEND- JAVASCRIPT
